Simple upload script with the options to list all uploads, or just upload. VTup will upload any file to the size and ext you allow, on the fly thumbnails will be created for JPG images using the GD.pm installed an most servers. The JPG thumbnail creating script can be used on it's own. The upload script has a built in perl tutorial explaining each section of the script and how to upload with out CGI.pm etc modules. You can have the option to select the directory the files are uploaded into.
