WaveWeaver® RFID Integration Engine for TI LF 134.2Mhz

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

WaveWeaver® provides solutions to leverage the benefits and eliminate the problems associated with RFID technology. WaveWeaver® easily integrates with RFID readers from many different manufacturers and supports divergent RFID tag types. WaveWeaver® abstracts the interfaces and tags so that the enterprise application need not be aware of hardware details. WaveWeaver® provides methods to deal with integration problems introduced by RFID technology including: - Defining logical reader groups to cover large spaces - Determining health of the passive collection devices - Tuning of hardware signal - Determining direction of tag movement - Determining reader location - Map tag values to defined values
