WBMP Converter Pro V1.2. - is a unique tool that gives you a perfect opportunity to convert color JPEG, GIF and PNG pictures into a 64-color WBMP. With this tool you're able to create "wireless bitmaps" (WBMP's). These are bitmaps according to the standard of the "Wireless Application Protocols" (WAP). Every wireless (web/wap) browser (e.g. a wap 2.0 enabled mobile phone) is able to visualize such a picture on it's display.
