Mobile Number	{value_mobile_number}
Email	{value_email}

Web Banners is an ASP based banner rotation system that uses a Microsoft Access database. Some of its features include: Random banner rotation, Ability to track impressions and click-thru's, Web based, password protected, administration area to delete/modify/add advertisers, Client area to view statistics, including click-thru's, impressions, ratios and other visitor stats. Advertisers can choose their own text under the banner. No components or server software needed.
