Omnistar Drive is a web file manager that will allow you to setup a secure file storage repository. Our web based file manager gives you the ability to create unlimited user accounts and give users custom permissions to various folders and files. Users permissions can also be customized in such as way as to allow them to have view, edit, delete or full rights to the file and folders that they upload. Our php file manager solution is entirely web based and can be used as an alternative to an FTP program. The web file manager solution is also a private label software allowing webmasters to brand the product as their own and resell to their customers. Other features of Omnistar Drive private label web file manager include a built in java upload tool that will allow you to upload files of any size, an advanced document search feature and a document email feature allowing you to email a link to a document to anyone.
