Web Based FTP with PHP and Sockets

Address   {value_address}

Contact Person   {value_contact_person}

Mobile Number   {value_mobile_number}

Email   {value_email}

This tutorial takes you through the creating of a web based FTP program using PHP and raw sockets. We do not make use of the PHP FTP api. Instead we build our client from the ground up by implementing the functionality as described in the FTP RFC.
