

# Web Directory SQL Search Engine

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This search engine is a full-featured web directory script designed for anyone wishing to build an on-line searchable database of web sites like your own yahoo directory. The script is designed so it can be completely administered through any web browser enabling the owner to add/delete/modify anything in the database. You can also rotate banners by keyword or category user is searching and place banners on generated HTML files by category. It requires mSQL 2.0+ or mySQL 3.0+ database engine.
