

Web File Browser (PHP Edition)

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Make your web server display the contents of a file server. Show folders and files in a collapsible tree. Access your files from anywhere on the web. Changes in the files or directories are automatically updated in the web file browser. Filter files by type and use a different icon in the browser for each file type.
