

# Web File Editor

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This script enables you to replace lines of text or html code in a single file or globally throughout a directory, from your browser. It will find and replace whatever line you enter, in the file that you specify. This utility script is great for changing email address or links within your Web Site.
