

Web file manager for Windows users (Active Directory)

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Web Based File Manager for Windows servers. Supports both Forms and Windows authentication. It looks like Windows Explorer and can be used to create online remote file management solutions. This file manager has many standard features like files list, upload, download, create, copy, delete and advanced features: directory tree, drag-n-drop, disk quota, SSL(HTTPS) support. One of versions designed to use secure Windows authentication or Basic authentication and it can automatically authorize users based on their security group membership. Users will only be able to access information they have NTFS permissions to. Intelligent web interface, allows users remotely access their personal or common folders. Most known browsers support!
