Web Page Backward Compatibility Viewer

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is an interesting Perl script that allows you to see what a Webpage would look like in the absence of certain features such as images, tables, java applet, style sheet, etc. It lets you specify a Webpage URL and a browser type, and select a variety of properties that the Webpage would support.
