Web Page Info

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Web Page Info component is designed to analyze web content and extracts all main items from any web page by the given URL. With Web Page Info you can get an access to the following items of any HTML page: keywords, descriptions, images, links, flash movies, frames and page titles. Web Page Info is a solution for "spider-similar" web or desktop software, which has to surf web sites and grab its content. Also this .NET component can be used for SEO to analyze keywords, titles and descriptions of your competitors. .
