

Web UI Credit Card Validator

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Web UI Credit Card Validator validates the major types of credit cards without connecting to payment processor. This component is designed as a web control to be used in any ASP.NET application. Design-time support allows the full user interface customizing for better integration in your application design. Web UI Credit Card Validator is the only credit card validation component, which does both client-side and server-side validation for better security, performance and low server load. With Web UI Credit Card Validator you can prevent the major fraud attempts even without connection to payment gateway and avoid addition problems with your credit card payment provider. Works with American Express, Bankcard, Diners, Carte Blanche, Discover, EnRoute, JCB, MasterCard, Switch, Visa, and Delta. Features: - Fully customizable web control with design-time support - Double security with client-side and server-side validation - Rejects major fraud attempts
