

# web2printer java enterprise

|                       |                        |
|-----------------------|------------------------|
| <b>Address</b>        | {value_address}        |
| <b>Contact Person</b> | {value_contact_person} |
| <b>Mobile Number</b>  | {value_mobile_number}  |
| <b>Email</b>          | {value_email}          |

Virtually every web page contains information that is only usable while browsing the website. In contrast, important information is lost while printing, Hyperlinks for example. Web2printer closes this gap and transforms every web page in a printer-friendly manner. Fully i18n support, use web2printer in your language. Use the SERVLET Filter to integrate web2printer in your Java 5 EE webapplication.
