webFrame

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

webFrame adds a unique component to your website. Similar to the techniques used by the popular sites such as Hotmail, webFrame allows you to keep your visitors within your website by placing a frame on top of webpages which are outside your website. This gives your visitors the option to later return to your website, allowing you to keep customers viewing your website longer.
