

# WebSlower

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This simple tool allows you to test local (or remote) website simulating different speed connections. It's very usefull to test Flash preloads or audio/video streaming and performace. It allows to see all the requests and responses headers you send and receive from the web server, execute custom requests and check the server response and develop faster using the integretad syntax-highlighted editor.
