WebSnapshot

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The component can be used to make a snapshot of a web page and save it in JPEG, BMP, PNG and GIF image formats. It can also retrieve additional information from the web page like its text, title and real URL. WebSnapshot can set Internet Explorer client area and thumbnail dimensions.
