

Webspy

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Webspy logs every traffic that visits your pages. It logs IP, browsertype/platform, referer, number of hits, last page visited. It only counts different IP's so if the visitor returns three days later the hits increase on it's unique IP. Uses a small install-file to install. You will only have to change the config-file.
