

Why XML Schema beats DTDs hands-down for data

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This article explains why XML Schema beats DTDs hands-down for data. It looks at four features of XML Schema that are particularly suited to data representation, and shows some examples of each. Code samples include XSD schemas and schema fragments.
