<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Widgetized Welcome Popup is a plugin for WordPress that allows you to add a highly customizable widgetized popup box to your blog or website. This popup box appears for all new visitors or for everyone on defined website parts (configured by administrator). It can be used to introduce yourself to new visitors or to notify everyone about something important or interesting or whatever. The main advantage of this popup is that it contains widget areas, where you can place any widgets available in your WordPress dashboard. It also accepts shortcodes. As an administrator you fully customize welcome popup box (size, colors, number of widget areas and other parameters). Widgetized Welcome Popup is a perfect way to extend functionality of your website.
