

WmlMail Servlet

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This Java servlet allows you to send email from WAP phone or any another PDA supports WML. It uses a text-based template file for mail settings including address of your smtp relay, smtp port, domain and contents of the letter. Appropriate WML form will be composed dynamically according to settings in the template file.
