

# WordPress Dynamic CSS

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

WordPress Dynamic CSS is a lightweight library for generating CSS stylesheets from dynamic content (i.e. content that can be modified by the user). The most obvious use case for this library is for creating stylesheets based on Customizer options. Using the special dynamic CSS syntax you can write CSS rules with variables that will be replaced by static values using a custom callback function that you provide.
