

WordPress Move

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

WordPress Move is a migration assistant for WordPress that is capable of changing the domain name in use and/or migrating your installation to another server either as is or based on your choices. In addition to these, you can use WordPress Move to transfer your database or create backups of your installation. For further information on using the plugin, please refer to the documentation provided with the plugin.
