Wordpress VTiger Webforms Generator (WP Tiger Pro) Pro plugin is most advanced one time easy to configure plugin even for novice users and beginners. With so many advanced features you can pull the fields from VTiger Lead and contacts module using Fetch Field Button. Widget form is useful to show your forms in any of your widget area like site wide side bar. The pro version uses the safest VTiger web service API to connect and communicate with Wordpress. Now in version 3.0.0 you can create unlimited forms for both lead and contact capture with individual short codes. With a new short code manager you can manage these short codes to edit, add, exclude, reformat, fetch and update the form with newly created VTiger fields, position, label etc. Create and use different types of forms now even in between any promotional contents. Now it is easy than before and triple your chance of your visitors to feed their info as leads.
