World Wide Email Verifier

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The World Wide Email Verifier will verify a list of email addresses with a DNS query. This will check the validity of the domain name in the email address. Works on the command line (not through your browser). This script should filter up to 80% of invalid email addresses.
