

# writedocMail

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Basic PHP-based Form Processor with required field checking. Provides all the files needed to get going quickly with very simple configuration; all you have to specify is the email address where feedback is to be sent and then move the files to your server and use. If you plan to use your own forms, additional instructions are included within the writedocMail.php file.
