xBoard

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script allows you to run message boards, similar to the WWW newsboards. Main features include: every user gets his/her password and thus only he/she can use his/her unique name, messages can be removed from the board by the writers, the board's administrater can log every action, there are several options to customize the board's design, single messages, whole threads or the whole content of the board can be emailed, and more.
