XML and Perl: Embedding XML in HTML

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This 6-page article explains what XML is, and what it can be used for. It also shows how to develop a Perl script to retrieve and display the contents of HTML embedded XML tags, and how to create a script that gathers news headlines from an XML file and creates an HTML news summary. Full source code for each script available for download.
