XML Countdown Customizable to the Millisecond

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is a resizable, vector countdown utility that you can customize to the millisecond. The active numbers are red and the inactive are gray. You don't even need to open the flash file. Put in the date you want to countdown to in the countdown.xml file and you are done. Also included is a version without the reflection. Only 4kb!
