This is a Flex MP3Player with true Spectrum Bars. The features of the player are:- 1. Users can add more and more music to the xml and play those songs. 2. Users can change the whole interface as they needed. 3. This player is having true Spectrum bars that are the main feature of the player. When the music is playing then the Spectrum bars are dancing with the music. Just you need to buy this and then use it as you need. The action script coding is very simple here. So users can make changes and use as they need t their websites.
