<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

xml photo album automatically places and centers your images and thumbnails on stage. All you need to do is to sort images, set the number of columns-rows for thumbnails, and thumbnail size in your data XML file. The code resizes images to stay in frame as well. You can also attach captions for your photos too. Extremely easy!! Put your files in an image/thumbs folder and work on the XML file.
