

Yellow Pages Script by StivaSoft

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The easiest PHP business directory script designed with a number of features to help you build and maintain a local business directory. Upgraded to the PHPjammers new generation UI, the Yellow Pages 3.0 will blow your mind with features right out of the box: multi-language support, geo coding & Google Directions, metadata & SEO-friendly URLs, online payments, owner accounts. The script is using MySQL to store the database and makes it very easy for anyone to manage business directory and yellow pages listings. Yellow Pages Script has an easy-to-use back-end where script administrator can manage business listing details, categories, listing ads per page, grant user-level access, etc. With a Developer License you can download an unencrypted version of the Yellow Pages Script and modify features and functionality.
