

# YouTube API Script

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This script runs on YouTube API and fetches millions of videos from the API. This script also has a search cloud function this script adds the tags to the db and counts the number of times its been searched and creates a massive tag cloud for the search engines to index. The script is completely SEO'd for easy search engine indexing, the script has a dynamic google sitemap that you can submit to the Google's Webmaster central. This script is a unique piece of code, created right here at API8. With this script, the possibilities are endless! You can set the video keyword to anything you'd like, and automatically you will have thousands of videos on that keyword, just like that. I will share with you two ways to make loads of money with this script.
