

YUIAsp.Net Button

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A better ASP NET Button, that supports skinning, and it's Text property allows HTML. The button control it's based on the excellent Yahoo! UI Library Button, but it's adapted for ASP NET, with support for postback and ASP NET Ajax client side script. The YUIAsp.Net Button control comes in several flavours: Regular button Link button Split button Menu button Radio button Checkbox button
