

Z-ODP

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Free ASP script that parses dmoz.org and lists the results on your site. Displays categories, category descriptions, category FAQs and search results pulled from dmoz.org. Also since ODP switched to utf-8, many of the older scripts will not display other languages. This one will. Future versions will include a cache system and other features. So far, this Beta version just the bare bones.
