Zoommap is a php4, Javascript1.2 component that allows you to display large pictures in your browser. It displays a loading gauge before showing the big image and scroll, and includes zoom and printing functions. This component show an image larger than the size of the browser window. It's specially designed to display a map or a card. A printing function allow to show an image with the piece of the map and some information attached to the image. Tested with E4,5,5.5,6 and Netscape 4.7,6 under Windows and Linux. The component is free to download, and can be freely redistributed.
