Email	{value_email}

Navicat is an intuitive GUI tool for PostgreSQL. It lets you create, browse databases and run SQL queries in an easier way. Advanced features include visual query builder, report builder, backup/ restore, batch job scheduling, remote connecting, and the ability to easily migrate data to/from Excel, Access and other data formats. It also provides a SQL Console and supports Data Synchronization. The latest version supports Code Completion, Form View and email Notification Services, etc.
