The 2009 Full CSS/HTML Content Reader Widget is a complete solution to display your content in a full css/html formatting manner on your website or integrate it in your application. The widget is fully resizable and settable via xml variables located in the settings.xml file. In the first section of the settings.xml are the options to set the mouse wheel speed, animation time and global shadow colour. mouseWheelSpeed='0.4' animationTime='1' globalShadowColor='#000000' In the next area of the settings you can setup the width, height, margin, padding, background colour, border, border colour, radius and special display for the background shadow of the widget.
