Action Script Viewer (ASV) is an advanced SWF (Flash movie) decompiler for Windows. Decompiles actionscripts, extracts sounds, bitmaps, text, displays the SWF timeline, lets you navigate the internals of a SWF file with context sensitive preview and an info pane. ASV can also extract outlines of vector symbols as Flash MX actionscript, SVG or a JSFL Tool. ASV fully supports Flash 3, 4, 5, MX, MX 2004 and will even show obfuscated scripts. New with version 4, now ASV can save resources and a JSFL command to rebuild the FLA for a SWF with Flash MX 2004. Offers a great head start when reconstructing the FLA. Visit the site for more info. (Note that current demo is of 3.00 version).
