

Advanced Dataflow Magento Extension

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The "Advanced Dataflow" extension is a set of additional adapters and parsers to increase Magento Dataflow flexibility. The Magento enables customers and products (with or without an inventory) to be exported / imported using CSV or Excel XML formats. The "Advanced Dataflow" extends default bounds to cover more needs. The most essential "Advanced Dataflow" feature is orders import and export.
