Advanced Menu Bar is a Java applet that allows you to make a professional menu for your site. Menus can pop up over HTML content, frames and even go over the browser window. The Advanced Menu Bar can even execute javascript functions. Features: Unlimited Buttons and Sub Menu's, Button and Menu data can be supplied either from html parameters or text file, Triple State Buttons, Configurable Mouse Over and Mouse Click effects, Full url support including window naming and frame targets - ideal for frames environments, Javascript support, Unlimited Icon images, and Adjustable Background Colors and Images. Extensive Documentation giving both a Quick Start section and an in depth explanation of every feature. Now inlcudes Sound support: Add sound effects to all menu events, menu open/close, button click etc. Source Code also available.
