Advanced Poll is a robust yet complete Joomla extension to help everyone create and manage polls effectively. This special Joomla component is tailor-made for Joomla. It is built to show polls in both of module position and Joomla, K2, Zoo content. Advanced Poll is strongly customizable and flexible. Apart from 8 gorgeous themes, there are tons of options to support you in changing colors or text of poll elements. Especially, the component enables you to add Captcha and set multiple security layers for each poll. Advanced Poll stays focused on data analysis and archives. The line, map and text statistics on dashboard highlight most noticeable parts while the poll log records detailed information of votes and voters.
