

Albamond XamlWebControls

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The XamlWebControls are a set of ASP.NET controls that consume XAML, perform a server-side rendering and display the outcome in the browser. Create and handle professionally looking graphical UI Elements like Images, Buttons, Panels, Tabs, etc. without leaving your Visual Studio Project.
