AllWebMenus Joomla Menu Addin: DHTML/JavaScript menu maker that lets you create any kind of popup or drop-down menus for your Joomla wesites/projects - no DHTML/JavaScript menu experience needed. Create cross-browser menus that work alike in all browsers by fully customizing them through available menu properties (i.e. css menu properties), themes, effects (i.e ajax menu effects), styles (slide/floating menus), etc. The AllWebMenus Joomla Menu add-in & component combination is designed to retrieve your Joomla menu from your Joomla website and import it into the AllWebMenus application to create stylish, feature-rich navigation menus, but not only! Apart from creating menu items derived from your Joomla menu structure, fully customize your menus adding your own non-Joomla menu items with external or internal links, html-rich content, colors, borders, effects, designs of your choice and much more!
