

Apycom Java Menus and Buttons

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A versatile, ready-made solution that allows professional and amateur web developers to create superior navigation systems for their websites. Contains 17 different types of controls that cover all possible web site navigation needs. Drop down and pull down menus, animated menus with killer visual effects, flat and 3d tabs, XP-style menus and buttons. Based on Java technology, Apycom Java Menus and Buttons possess several unique features not available in DHTML menus. For example, drop down menus from this suite may drop out on top of any frame, form, flash animation and even from the browser window.
