ARI Smart Content is a Joomla! component which can help you to make the content of your site more attractive and user-friendly. Idea of ARI Smart content is to create a pluggable tool that combines various content effects like: accordion, tabs, popup, scrollers, news sliders, table wrappers and many other. You don't need technical knowledge to use the power of different pluggable effects in your Joomla! system. More over, you don't need to find and pay for different Joomla! components such as Joomla! tabs component, accordion component, lightbox component, Joomla! newsslider component, CSV extension and other. Now you receive it in one package and pay only once, the component is also expandable and it allows to add new plugins which you can find in plugins repository. It comes with module where you can type plugin tags and display this content on your site.
