<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Barcode Professional Mobile WebControl generates on-fly barcode images for ASP.NET Mobile Web Applications. It can generate the most popular Linear and 2D Barcode Symbolologies. After specifying a Value to encode, choosing a Barcode Symbolology, and setting its properties, Barcode Professional will render the barcode image for each mobile device in the preferred image format by each of them.
