

ASPActiveConverter Component

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

ASPActiveConverter is a lightweight component suitable for dynamic inter-conversion of documents in various formats (.doc, .rtf, .txt and .html). For example, Given a word document file, ASPActiveConverter can generate a perfect html file that can be viewed in a web-browser or other file viewers. For complete details on available properties and methods, download ASPActiveConverter v1.2 Component Documentation.
