AspLib - MaskedTextBox

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This component is AspLib component library part. This control almost completely mimics the standard Windows MaskedTextBox (it uses the same mask templates, on entering text visible mask is highlighted...). This component works in Internet Explorer, Opera and Mozilla. The "Mask Edit" control enables developers to set mask property by which the user input to "Mask Edit" can be restricted. The control has some client side events. Full ASP.NET AJAX supports.
