

AspLib - WebTimer

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This component is AspLib component library part. Use the WebTimer control to update/refresh any page that relies on changing data. WebTimer will automatically post back a webform (aspx page) at specified intervals. WebTimer raises an Elapsed event back at the server after the post-back occurs.
